

# RITCHEY 1-BOLT SEATPOST CLAMP ID

The Ritchey 1-Bolt seatpost design accommodates all of the various rail diameters that are offered today. The seatpost comes with a standard clamp to fit all 7x7 rails and we offer clamp kits for all other rail diameters. Please be sure to use the correct size for each saddle or you may experience slippage. The clamp kits are also specific to alloy and carbon posts. Below is a cheat sheet to help identify each clamp kit. Please contact us through [ritcheylogic.com](http://ritcheylogic.com) if you have any questions.

SEATPOST & SADDLE SPEC	CLAMP SURFACE	IDENTIFICATION MARKS	FORGED STAMPING
Carbon For 7x7mm Saddle Rails	With Ridges	NONE	NONE
